

Practical2: Creating account, repository on Github and Cloning repository in Github

a) Creating Account

Go to <https://github.com/>

Then click on Sign up

Fill up your detail ::-

Username, Password, and Email:

create your account

Username *

Email address *

Password *

Make sure it's at least 15 characters OR at least 8 characters including a number and a lowercase letter.
[Learn more.](#)

Then verify the your email and click create account :

Email preferences

☒ Send me occasional product updates, announcements, and offers.

Verify your account

Please solve this puzzle so we know you are a real person

[Verify](#)

[Create account](#)

By creating an account, you agree to the [Terms of Service](#). For more information about GitHub's privacy practices, see the [GitHub Privacy Statement](#). We'll occasionally send you account-related

- **Select the occupation**

What kind of work do you do, mainly?

Software Engineer I write code	Student I go to school
Product Manager I write specs	UX & Design I draw interfaces
Data & Analytics I write queries	Marketing & Sales I look at charts
Teacher I educate people	Other I do my own thing

b) Creating Repository :

Click on + sign and click on New repository

Give Name to your repository and do the setting as per required

Create a new repository
A repository contains all project files, including the revision history. Already have a project repository elsewhere?
[Import a repository.](#)

Owner * Repository name *

 Nihar2520 /

Great repository names are short and memorable. Need inspiration? How about **studious-palm-tree?**

Description (optional)

☒  **Public**
Anyone on the internet can see this repository. You choose who can commit.

☐  **Private**
You choose who can see and commit to this repository.

Initialize this repository with:
Skip this step if you're importing an existing repository.

☐ **Add a README file**
This is where you can write a long description for your project. [Learn more.](#)

c) Cloning repository:

Click on Code in green highlight as shown in screen shot:

You can clone it with three steps as HTTPS or SSH or GitHub CLI:
